

Track Access Computer Based Training and Assessment

Internet Training comes home...

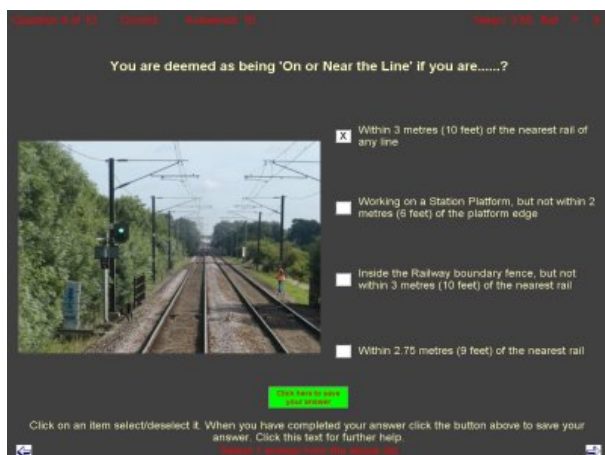

Track Access **OnSite** CBT Software Package for Railway Driver Training and Assessment is now active within the UK Train Operations Community.

The system can be installed and operated within company network and extended for general access over the internet, offering many new and exciting possibilities, including controlled home access for students. Track Access also offer a Managed **Webserver** Option where we operate and manage the system on behalf of the client.

Levels of control...

The CBT System has three components, a CBT Server which stores all data and content, the Trainer Station which connects to the server for system administration and content maintenance and the Student Station which connects to the server for running tutorials and assessments.

Our Computer Based Training is currently installed for National Express 'one Railway' and First Group Companies at 'First ScotRail' for Driver Training & Assessment.

Track Access Computer Based Training has been designed as a package which is both easy to use and simple to implement. The Student connects through a browser-less web based interface with a clear full screen display, which can be easily navigated by the student.

Individual assessments can be simply created and amended as needed, by the Training Manager. Differing questions types may contain various media content including photographs, graphics, videos and sounds. Existing PowerPoint presentations can also be incorporated. Assessment sessions can be accurately controlled and timed.

Answers can be automatically marked and trainers can review the answers at the end with the student.

Task	Description	Type	Completed	Score	Max. Score	Pass Mark
PTS	PTS	Practice		0	0	70
PTS	PTS	Practice	02/09/2008 12:28	11	13	70
AC	JAC	Practice		0	0	70
PTS	PTS	Practice	02/09/2008 12:28	15	15	70
AC	JAC	Practice	02/09/2008 12:19	10	10	70
PTS	PTS	Practice	02/09/2008 12:16	13	13	70
PTS	PTS	Practice	02/09/2008 12:57	10	10	70
AC	AC	Practice	02/09/2008 06:03	9	10	70
PTS	PTS	Practice	02/09/2008 20:38	15	15	70

Features Include:

- Create training material to teach / refresh students skills.
- Create assessments and questionnaires to test students skills.
- Record & Review the results of assessment questionnaires.
- Replay assessment questionnaires.
- Produce printed documentation of assessment results.
- Analyse students performance.
- Analyse the tasks assigned to groups of students.
- Analyse the questions used within questionnaires.
- Enable students to securely access and use the training materials and questionnaires assigned to them.
