

# Road Survey Reports

## *Incident Survey and Reconstruction*

Road Video Replay Reports are the recent development of a UK based company, Track Access Services Ltd. and are designed for users throughout the transport sector. The system enables the production of CD/DVD disc reports which will play on any PC desktop or laptop computer, and may be copied and stored locally on a hard drive or server.

The disc reports combine a high resolution video view linked to a detailed blend of moving map and aerial photo. Each disc report will contain several views required to support incident resolution including, insured's view, 3rd party's view, witness and/or pedestrian view and traffic light sequences.

As pictured above, the system provides advanced user facilities which include frame by frame positional adjustment, accurate measurement of distances plus copy and paste facilities, to move pictures other applications.

The system has been specifically designed to be used by insurers, legal firms and the police to assist with evaluation and investigation of personal injury and Road Traffic Accidents and support the legal profession. For more detailed information about Road Video Replay Reports, please call or email.

*E-Formation for the future*
